Asteria Consumer Group | Synthetic portfolio dataset | TRY | July 2026

Executive Overview

FY2026 outlook and the management decision case

FY2026 REVENUE FORECAST

TRY 1.79B

-2.6% vs budget

FY2026 EBITDA

TRY 164.4M

9.2% margin

BASE-CASE ENDING CASH

TRY 245.6M

TRY 236.3M minimum

CHAMPION ACCURACY

97.7%

4 business-unit models

Management message

Revenue is forecast 2.6% below budget, yet operating-expense discipline lifts EBITDA 3.5% above plan. The base case preserves liquidity. Management should close the commercial gap without sacrificing margin quality.

Decision priorities

1. Protect digital and subscription growth
2. Correct the retail revenue gap
3. Tighten working-capital discipline
4. Run a monthly rolling-forecast cadence

End-to-End Planning Architecture

A reproducible flow from source data to management action

01

SOURCE

Synthetic ERP, CRM, HR and capex

→

02

TRANSFORM

Python controls and forecasting

→

03

STORE

CSV analytics layer and SQLite

→

04

MODEL

SQL, Power Query, DAX and PBIP

→

05

CONSUME

Excel, Power BI, PDF and decks

Reproducible

One command regenerates data, runs forecasts, refreshes reporting tables, and repeats all controls.

Auditable

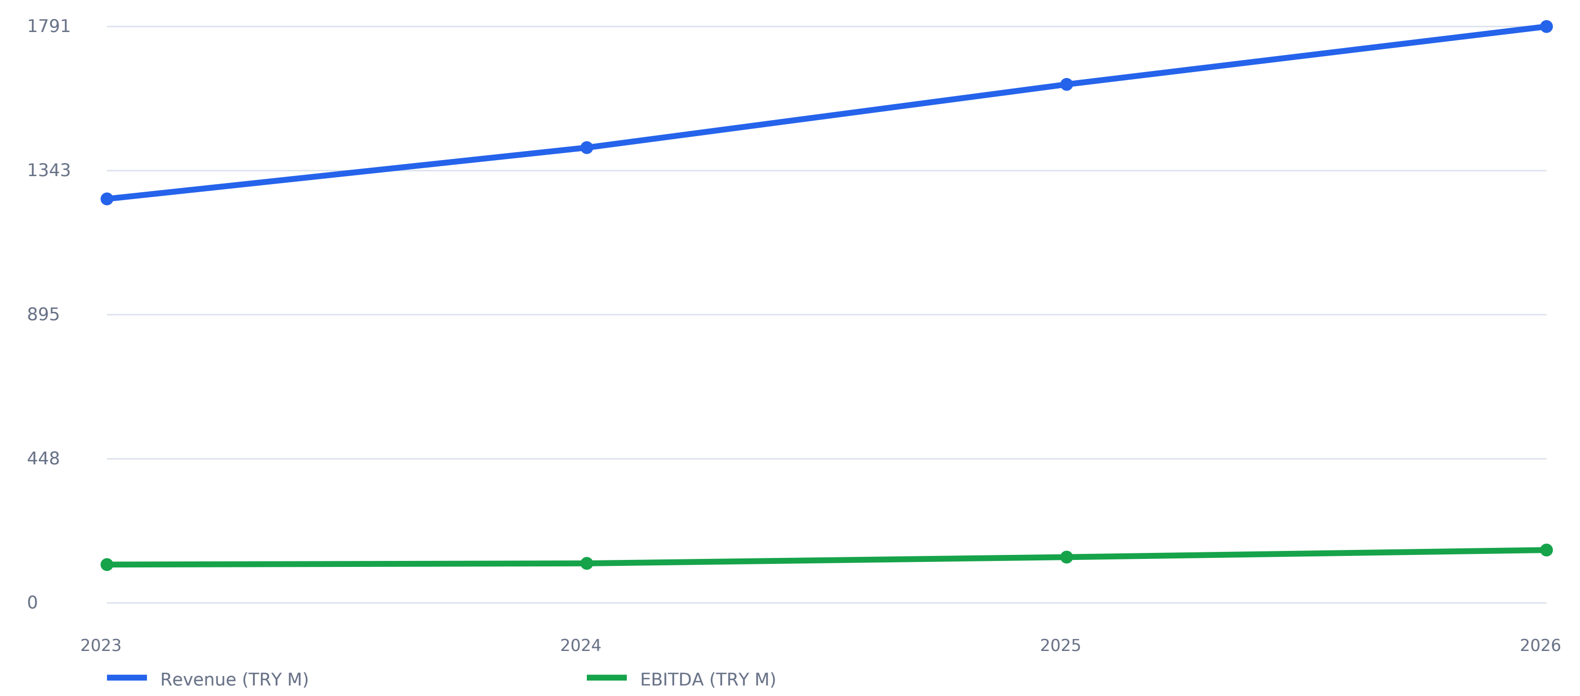
Version, period status, source system, assumptions, and validation evidence remain visible.

Portable

PBIP embeds sample data; Excel, SQLite, SQL, Python, and documentation can be reviewed independently.

Historical Performance

Revenue scaled while profitability required active management



2023–2025 REVENUE CAGR

13.3%

two-year growth rate

FY2025 EBITDA MARGIN

8.8%

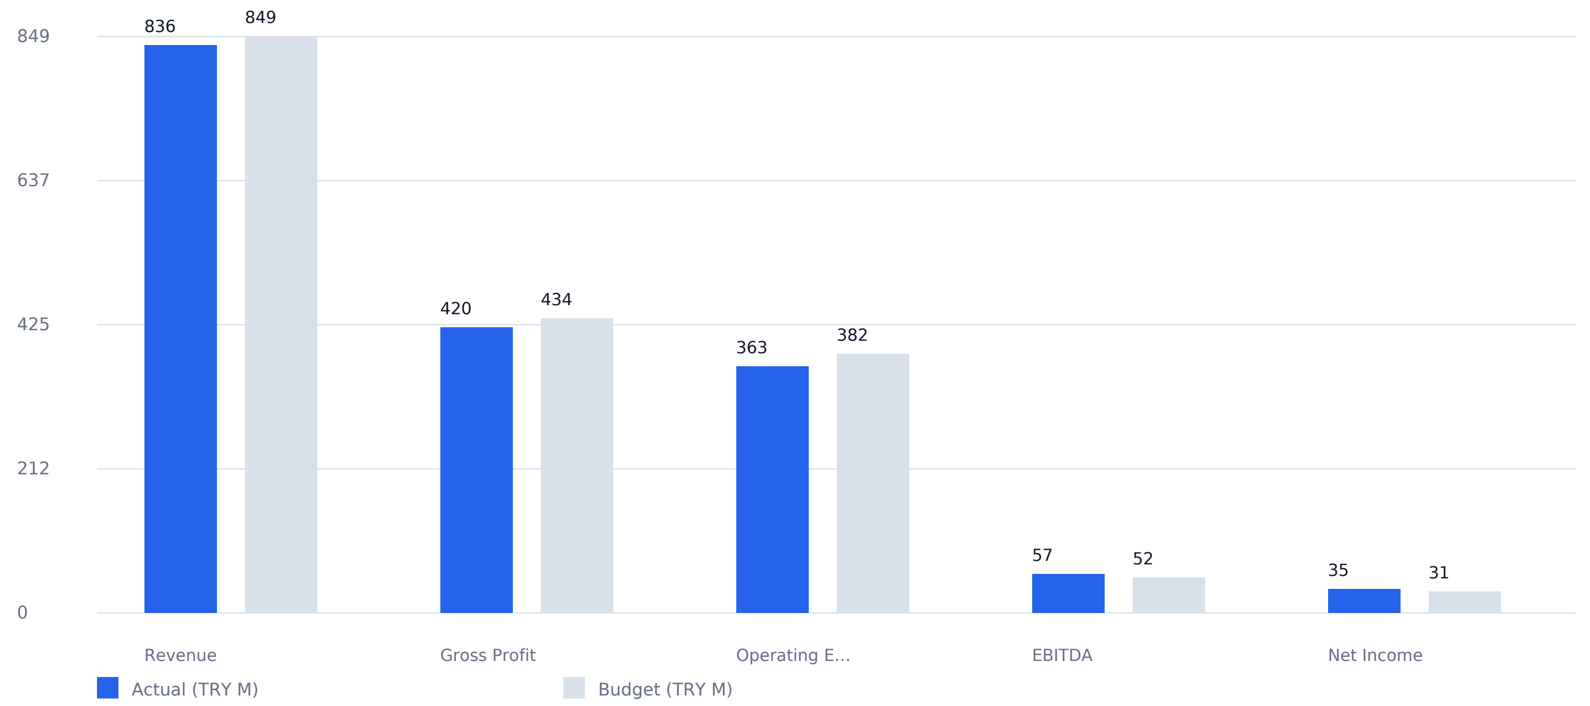
TRY 142.3M

Interpretation

Growth remained healthy, but margin quality stayed below FY2023.

H1 2026 Actual vs Budget

Revenue softness was offset by operating-cost discipline



REVENUE VARIANCE

-TRY 13.2M

-1.6%

EBITDA VARIANCE

+TRY 5.1M

+9.9%

Read-through

TRY 18.5M of opex savings kept EBITDA and net income above plan.

FY2026 Forecast vs Budget

Lower revenue, stronger EBITDA, and disciplined spending

Metric	Forecast	Budget	Variance	Status
Revenue	TRY 1,790.8M	TRY 1,838.8M	-TRY 48.0M (-2.6%)	Unfavorable
Gross Profit	TRY 904.9M	TRY 942.2M	-TRY 37.3M (-4.0%)	Unfavorable
Operating Expense	TRY 740.5M	TRY 783.4M	-TRY 42.9M (-5.5%)	Favorable
EBITDA	TRY 164.4M	TRY 158.8M	TRY 5.6M (3.5%)	Favorable
Net Income	TRY 107.4M	TRY 103.2M	TRY 4.1M (4.0%)	Favorable

Key outcome

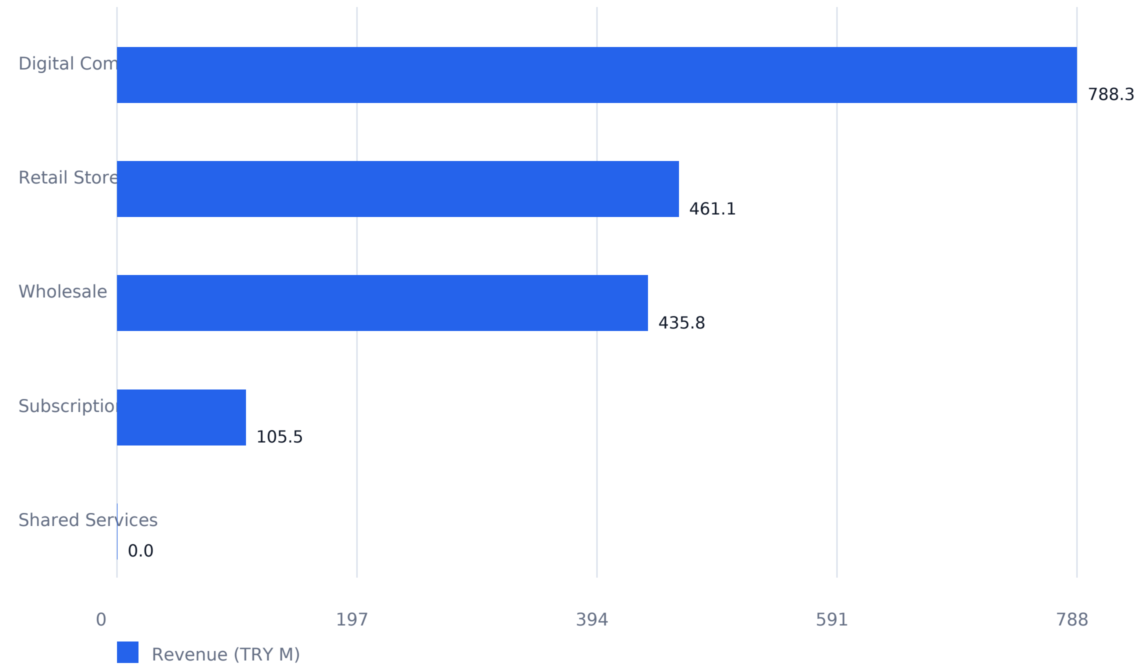
Revenue is TRY 48.0M below budget. EBITDA is TRY 5.6M above plan as operating expense remains controlled.

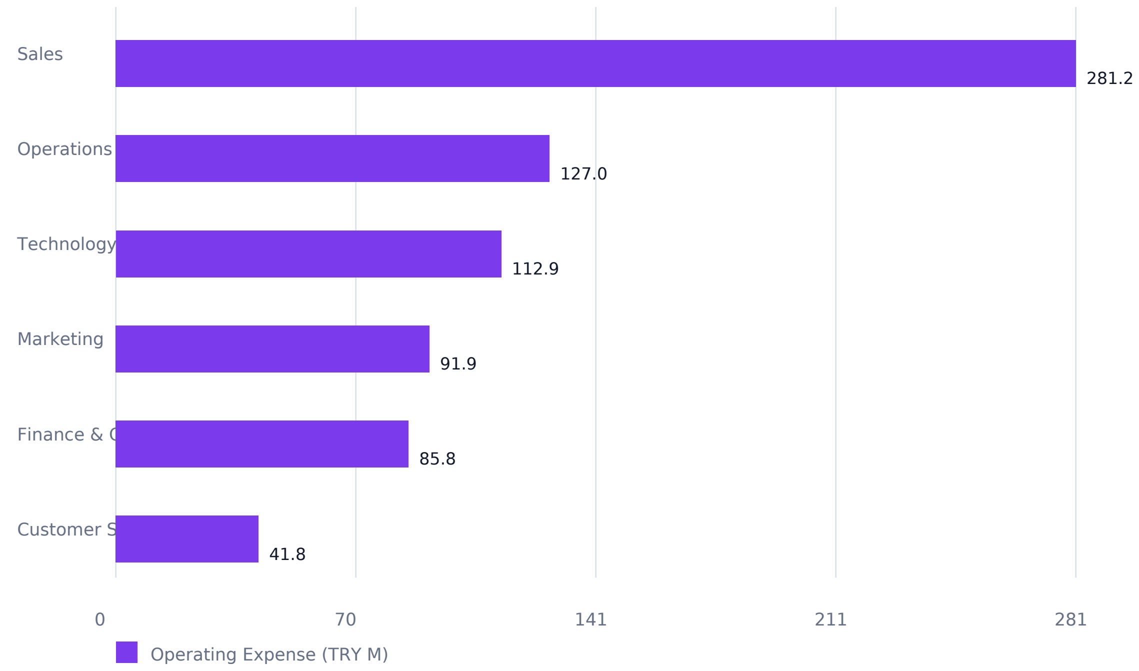
Planning decision

Deploy targeted commercial actions to close the revenue gap, while preserving productivity-based opex discipline and avoiding broad, value-destructive cuts.

Revenue & Cost Drivers

Business-unit mix and departmental spend shape the outlook



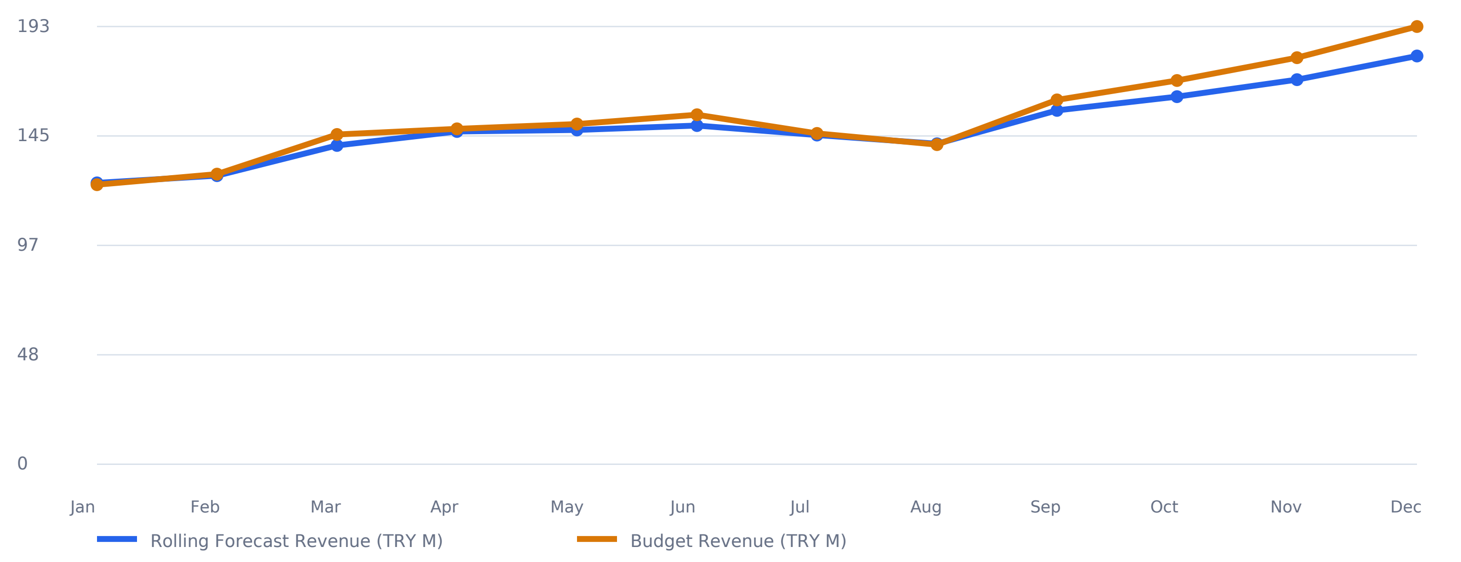


Decision lens

Digital Commerce contributes 44.0% of FY2026 revenue. Protect scalable channels while linking departmental spend to explicit commercial and productivity outcomes.

Rolling Forecast & Model Governance

Closed actuals, refreshed drivers, and evidence-based model selection



Business Unit	Champion Model	WAPE
Digital Commerce	Linear Trend + Seasonality	1.0%
Retail Stores	Linear Trend + Seasonality	2.8%
Subscription Services	Log-Ridge Seasonal	3.6%
Wholesale	Log-Ridge Seasonal	1.7%

AVERAGE CHAMPION ACCURACY

97.7%

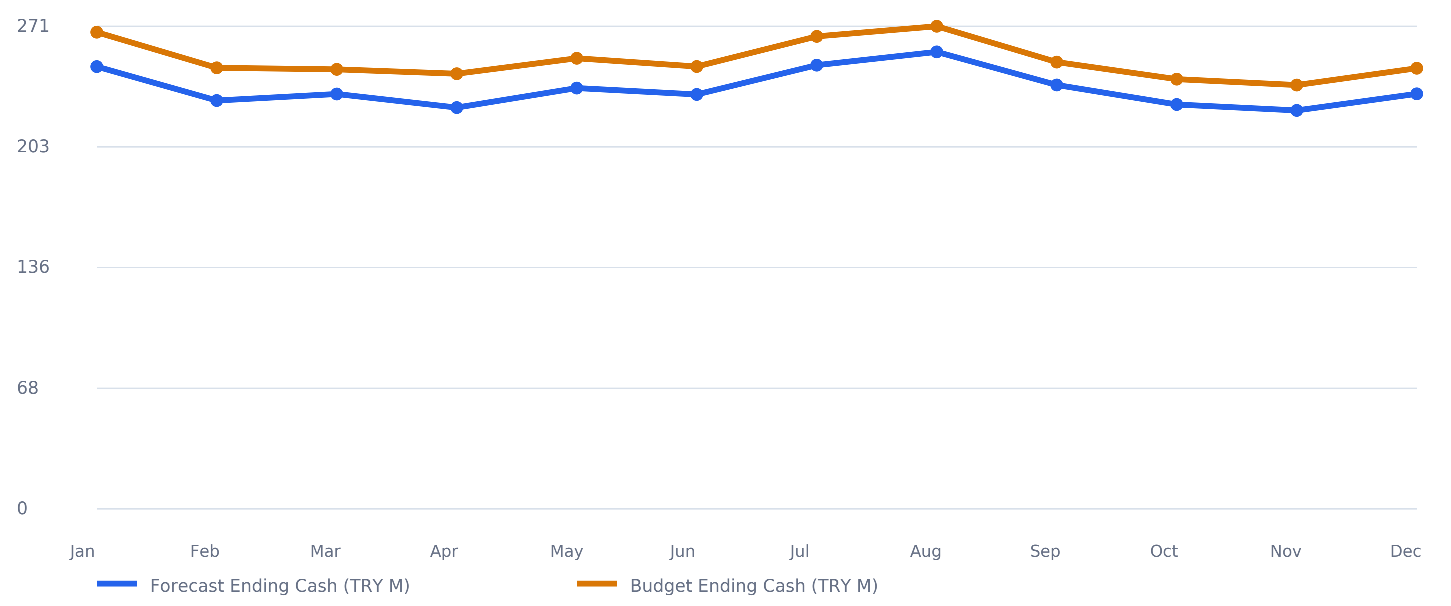
4 governed models

Monthly cadence

Close → variance review → driver refresh → model run → management approval

Cash, Liquidity & Working Capital

The plan stays liquid; cash conversion remains a controllable value lever



FY2026 ENDING CASH

TRY 233.2M

-TRY 14.4M vs budget

FY2026 MINIMUM CASH

TRY 223.9M

positive liquidity buffer

Working-capital action

Accelerate collections, reduce inventory days, and optimize supplier terms responsibly.

Workforce & Capital Allocation

Headcount and capex are linked to strategic priorities

CLOSING FTE

231

December 2026 forecast

PAYROLL + BENEFITS

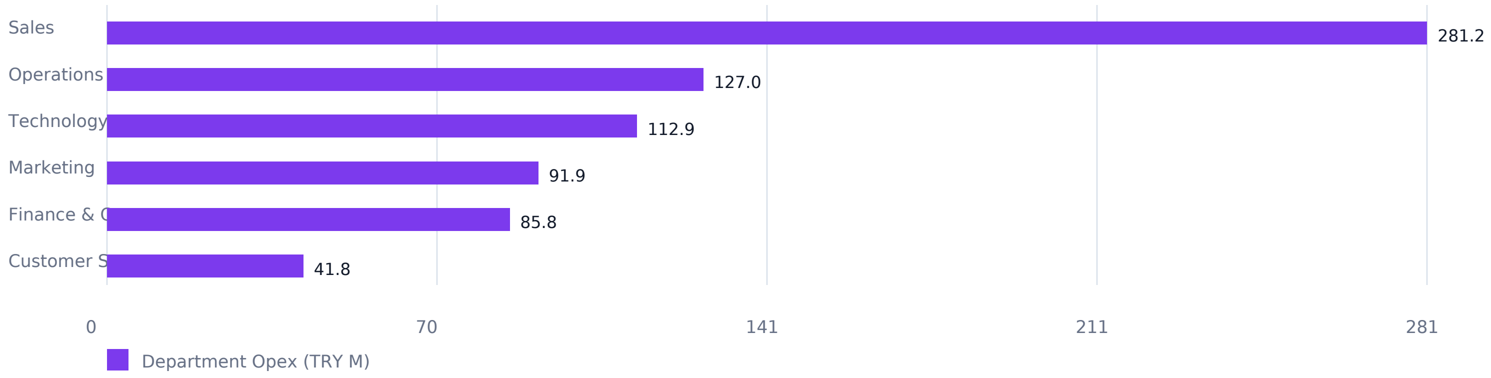
TRY 313.9M

FY2026 forecast

CAPEX

TRY 39.4M

FY2026 investment spend

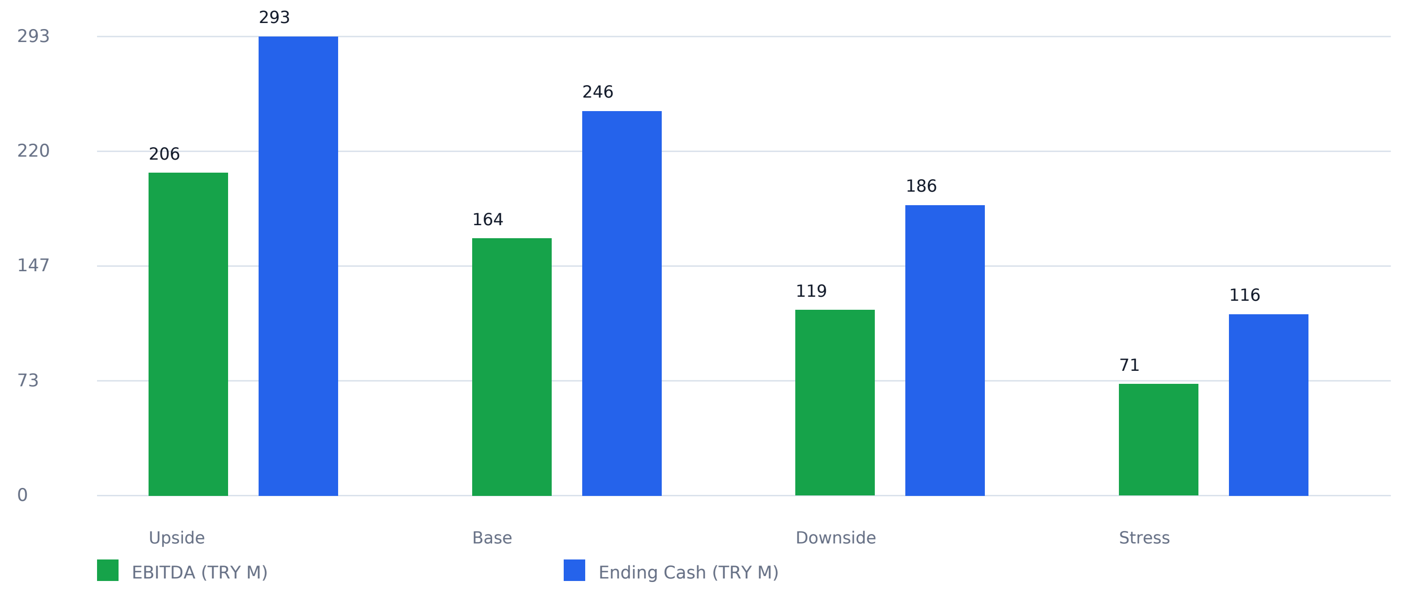


Governance rule

Hiring and capex requests are assessed jointly through revenue capacity, productivity, cash impact, strategic fit, and resilience under downside scenarios.

Scenario Planning & Risk

Four coherent cases plus a 5,000-trial Monte Carlo distribution



REVENUE P10 / P50 / P90

TRY 1.62B

TRY 1.79B / TRY 1.96B

PROBABILITY EBITDA BELOW BUDGET

47.6%

5,000 Monte Carlo trials

Stress boundary

Stress ending cash remains positive at TRY 115.9M, but CCC extends to 77.8 days.

Management Roadmap & Delivery

A portfolio-ready system and a practical 90-day operating cadence

0–30 DAYS

Formalize data ownership, close calendar, assumptions, and variance-accountability.

31–60 DAYS

Operate driver refresh, forecast backtests, and monthly cross-functional review.

61–90 DAYS

Automate scenario triggers, exception alerts, and management action tracking.

Delivery Layer	What a reviewer can inspect
Python & SQL	Reproducible planning engine, database, analytics views, tests
Excel	31-sheet formula-driven FP&A planning and scenario workbook
Power BI	11-page PBIP with embedded data, semantic model, and DAX measures
Executive communication	20-slide EN/TR decks, 12-page vector PDF, HD images
